EDITOR'S LETTER

The impact of collective injustice on the whole community, including myself "massive destruction."

Injustice is defined in most dictionaries as "absence of justice" or "violation of a right or the rights of another." It is also described as "unfair treatment or a situation in which the rights of a person or a group of people are ignored." Therefore, I believe collective injustice is when most people, institutions, corporations, and governments collaborate to wrong you, violate your rights, and never listen to your complaints or give you the chance to defend yourself. The impact of collective injustice on me is very disastrous. Therefore, I am writing these lines because I fear you will be next on the list. Dr. Martin Luther King (1963) said, "Injustice anywhere is a threat to justice." You cannot imagine my feelings. I feel hopeless and lost while writing this editorial message. Words fail me to express my continuous miserable state because of the collective injustice that has impacted all aspects of my life. Imagine the disastrous impact of collective injustice on me when I chose my ex-wife as my partner. She could destroy my life and my family entirely with the help of her family and others. Imagine the disastrous impact of collective injustice on me when I arrived at San Jose State University in August 2002 and how they wronged me from the beginning to the present. The situation was getting worse every year. It reached its zenith in June 2017. Collective injustice against me has reached a level impossible for me to bear. May God protect me from losing my patience and reason.

Important Alert

The purpose of writing this book is not to offend any person, institution, group, political party, government, or country in the world. Instead, the purpose is to report and tell what befell me of wrong lest my experience would be repeated with others. This book is intended to keep the stability of the community and guarantee the protection of its members, whether native or expatriate. It is a cry from me so that it may reach the ears of the world. Perhaps someone will hear it and help me to restore my lost and stolen rights. I intend to mention the names of some people who have done me wrong. I am not against any person, institution, government, or political party, but I am against any corruption or transgression by some irresponsible individuals who do not fulfill the role assigned to them appropriately. This is only for your information.

This alert will be included in all the collective injustice books and magazines.

Our government, with its Institutions in California, neither Listen nor Cares

For several years, I have been trying hard to ward off collective injustice in my arena the injustice of many people and institutions, which is countless. I found no one to help me except God, Lord of the worlds. So I told myself to approach the government and its institutions, the judiciary, and lawyers, seeking help from all of them. Here, I present to them my petitions, letters, and valid evidence so that I may find among them someone who will be fair to me and remove the yoke of injustice from me. It cost me great effort, precious time, and much money, in addition to burning my nerves and deteriorating my health. My lack of resources hardly covered my daily living needs or my medical and health requirements, which prompted me to drown in many debts that exhausted me. In addition, they mistreated me when I demanded my legal rights in all my transactions and entitlements as an elderly American citizen with special needs, but no one listened or cared. It is the first volume among more than thirty-five volumes, containing between its covers all the evidence of letters and petitions showing fraud against my person, which had a disastrous effect on my work, my health, and my entire life, and my responses to all of that with irrefutable evidence.

**“Injustice
anywhere
Is a threat
to justice
everywhere.”**

Our government, with its Institutions in California, neither Listen nor Cares

Title story

Before I gave a title to this volume, I thought of several titles that would be appropriate and related to the topic I am writing so that the reader is aware of what I am saying and realizes the magnitude of the tragedy I went through. Among the suggested titles were:

- 1 - Our Government, with its Institutions in California, neither Listens nor Care
- 2 - The California government is in one valley, and the rest of the honorable Californians are in another valley.
- 3 - The rights, duties, inequality, and false mask of the California government
- 4 - Dear California government, I am not a criminal.

After consulting with several loyal friends, the first title was chosen because it was more appropriate.

Looking for legal representation

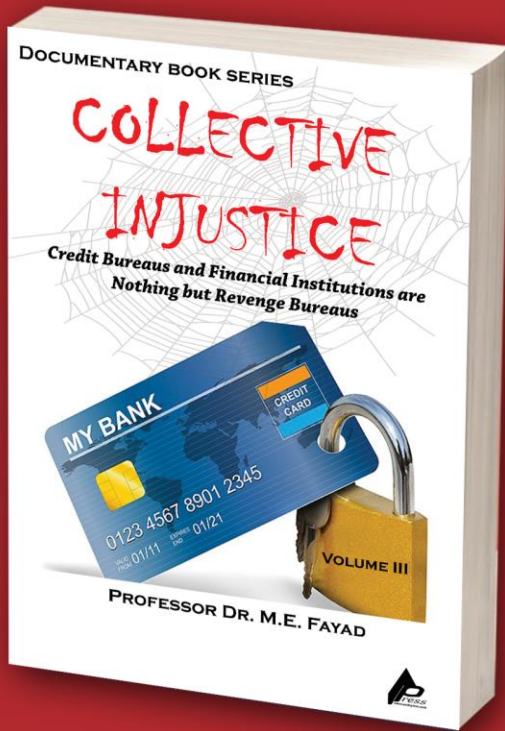

Our government, with its institutions in California, doesn't listen or care. I don't know anything about the law in the USA, but I do know that " citizens of the United States have the right to sue both state and federal governments, their agencies, and public entities ". I seek to achieve justice and citizenship rights.

Furthermore, I have dealt with governments, public bodies, and entities that did not listen or care and even initiated denial and extremely abusive treatment .

Credit Bureaus and Financial Institutions are nothing but Vindictive Bureaus.

I have suffered a lot from the mistreatment of companies, banks, credit bureaus, and Wells Fargo, which I think colluded with the bank I deal with and deliberately destroyed my financial reputation and all my business, which negatively affected all my activities and deprived me of my economic rights by publishing false information about me to all financial institutions and all parties that need a financial report on me. In the last six years, I have compiled a complete record of all credit companies and their offices, due to which I wasted a lot of time contacting all of them on the phone and writing correspondence to them. However, they didn't help me with anything. Moreover, I didn't get any support from them to compensate me for what I suffered, like severe losses and damages, and they unjustly robbed me of money. Please consider these allegations of mine because they are tough. You can check the evidence attached to the book, which includes the latest information about my bank and credit cards and contains many errors and contradictions. I am tired of being rejected and unwarrantedly mistreated by all banks.

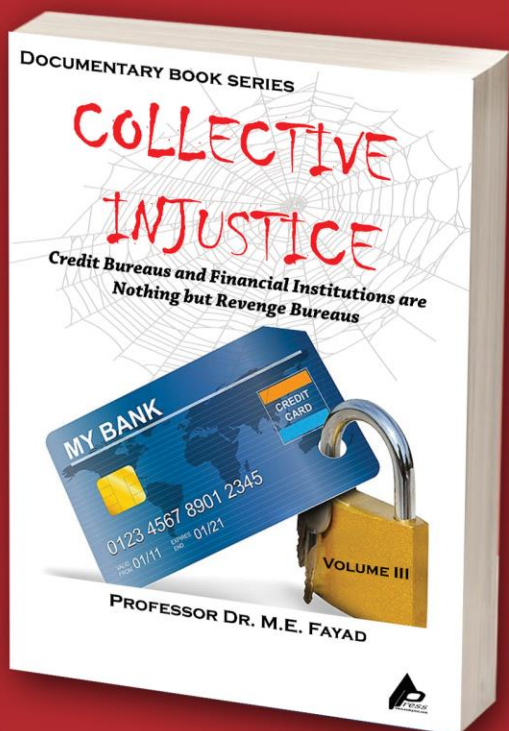

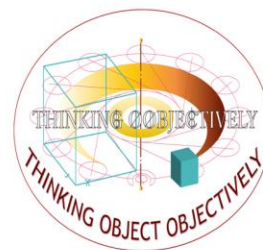

Injustice
anywhere is a
threat to
justice
everywhere.

Wells Fargo: a symbol of denial and irresponsibility

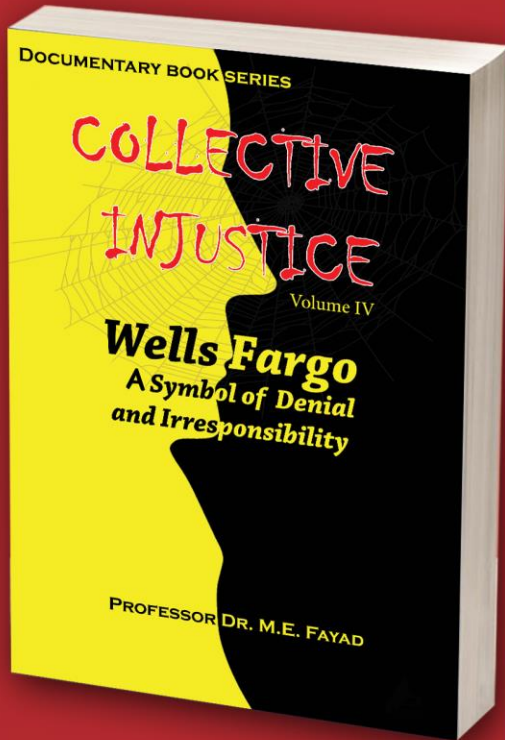

I became at the end of my rope after my rights were lost, my reputation was tarnished, and my financial and social situation was weak when my ex-wife seized the opportunity to open two accounts at Wells Fargo Bank without my knowledge in 2012. Moreover, in collaboration with a bank employee, she forged my signature during my illness and heart transplant in July 2016. My ex-wife kept withdrawing large sums of money from those accounts. After discovering the two accounts in 2018, they were closed. As a result, this matter left a bad reputation in my financial situation and significantly harmed me. Due to this, I fell into significant problems, including being deprived of financial transactions with the bank and being refused any requests I submitted.

Moreover, funding sources stopped, and many of my projects stopped with them. My request to open an account for my publishing house was denied despite having all the necessary legal papers. Then, I submitted complaints to the bank to investigate the matter, primarily related to the crime of forging my signature. Still, the case has not been decided so far, and my complaint has not been answered nor investigated as if I were screaming in a desert where no one responded to my call or felt my suffering. The ugliest thing is the inhumane treatment that the bank employees at Wells Fargo used to deal with me. The bank took arbitrary measures against me and my commercial accounts and regularly disbursed vast sums of money to several institutions without my consent. The bank deliberately spent vast sums of money on my ex-wife, who withdrew my savings and money without my permission and knowledge, not to mention the mistreatment by the bank employees.

Avana San Jose: The Tenant who is the Landlord's Victim

The first six months of living in the apartment were passed peacefully without any disturbances. However, after a while, I faced many problems when I moved to a new apartment. I met issues with the apartment owner due to negligence and delays in maintenance dates, which led to huge losses and damage to my stock of food inside the freezer for more than three months, which increased my financial burden. Moreover, the people there could have been more cooperative. They refused to carry my things or purchases into the apartment because it was on the second floor. Not to mention the racist behavior against me in emails and correspondence, as if there was an organization or paid people behind it.

To make matters worse, they sent me a petition from their attorney demanding \$420 in fees, which I had nothing to do with. I called my attorney for twenty minutes of legal advice over the phone for \$110. He advised me to pay the amount and that there was no need for problems because I would not be able to buy or rent a house if I did not pay. The amount has now reached one thousand dollars, in addition to the losses resulting from neglect of maintenance, estimated at five hundred dollars. It cost me over \$1200. The apartment rent is about three thousand dollars per month. You paid it on time. I have the case number filed against them at the police station because the apartment affected my health. Moreover, I asked them to repair it at my own expense. Still, they refused, and no one listened to me, so I decided to leave this place if I received all my dues in total and had an official certificate from them guaranteeing my residence in an apartment unsuitable for human living.

THINKING OBJECTIVELY

First Special Issue

There may be times when we are powerless to prevent injustice, but there must never be a time when we fail to protest.

An Inauspicious Start at San Jose State University

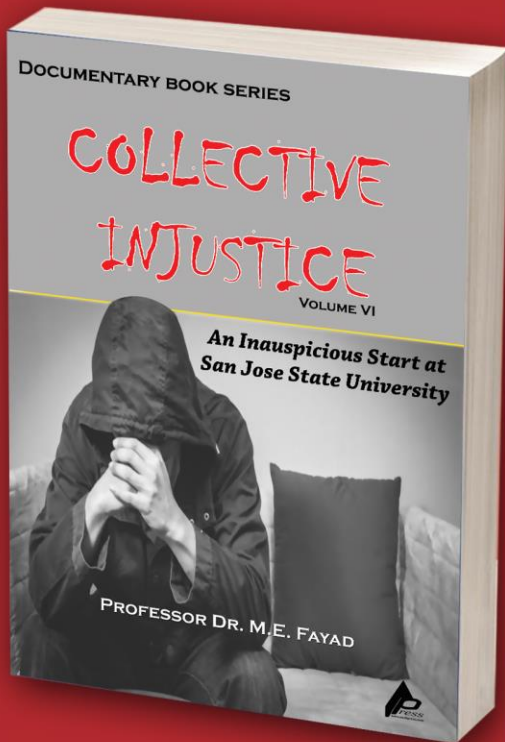

My tragedy at San Jose University began when I was invited to attend an interview for my university appointment in July 2002. During that time, I met a university professor called Gilda Pour, who was of Iranian origin and was working at the university. She begged me not to accept the university's offer to work there. Unfortunately, I did not take her advice, and I received the letter of appointment after the university dean assured me everything would be fine. I met many Silicon Valley scientific groups encouraging me to live in the area. Then, I returned to my office at Lincoln University and received a phone call from a university faculty member who spoke to me rudely and told me there was no place for me at the university. What a bad start! I immediately called the dean, who asked me not to worry, but after I returned to the university, I was surprised that he had left after a short period. This book includes many examples of ill-treatment by some university faculty members, except for one or two people who treated me kindly and one of whom arranged a convenient place to stay at the beginning of my stay in San Jose.

SJSU: An attempt to assassinate a scientist morally (from 2006-up to now)

The book contains chapters dealing with abusive and discriminatory behavior and corruption cases by many faculty members in the College of Engineering, especially the Department of Computer Engineering.

I lived for four years in hell, during which I sought the tenure process at the university as a permanent university professor and filled out forms and documents to the fullest. Professor Isaac from the College of Business Administration called me to offer his help because he had the same experience when he joined the same university. After that, he was so disturbed by what happened to me that I had to leave the university at the end of the semester on the pretext that the university's president saw that I was not good at teaching at the university. Isaac advised me to seek the help of a lawyer, especially after they signed a contract with me that I work as a lecturer and not as a professor, which resulted in demoting me and reducing my total salary from ten thousand dollars to only two thousand dollars. I was so shocked and humiliated that I needed more than \$8,000 monthly to cover my expenses.

“It takes no compromise to give people their rights... it takes no money to respect the individual. It takes no political deal to give people freedom. It takes no survey to remove repression.”

Laws of the Jungle

In what law does this situation exist: that a person obtains their legal rights in the same case twice in two different countries? Is this the justice we seek in your esteemed courts of justice? It happened to me. In these few lines, I will present my case so that you may realize the extent of my tragedy and suffering in a case that is stranger than fiction. My case is summed up in that my ex-wife obtained legal rights from me after I divorced before the Egyptian judiciary by Egyptian and Islamic law. There is nothing wrong with that because it is her legitimate right, and I acknowledge it, but for her to take the same rights in the same case before the fair American judiciary is absurd. It is meaningless, and I cannot find any word to describe it in all the world's dictionaries except that it is the ultimate injustice in its ugliest form. What law approves this? Is it reasonable for a person to be punished for a crime he committed twice before the courts in two countries? Does this exist in any item of the law? It only exists in the laws of the jungle. How can my ex-wife get her rights twice? And how can I be punished and fined twice in the same case? O scholars of the law, please advise me on this matter. Do I not have the right to regain the rights that were stolen from me and eliminate the collective injustice against me? Why did the Santa Clara Family Court mistreat me as if I were a criminal? Answer me: I am tired of the long silence, as I have suffered collective injustice for a long time.

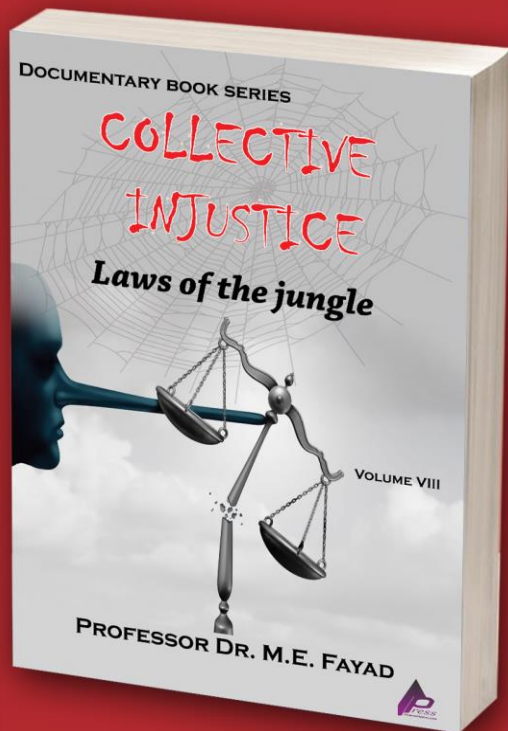

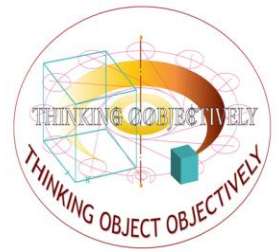

If you can live
amid injustice
without anger,
you are
immoral as
well as unjust.

Aeesh Press Inc Company Facing Collective Injustice

This book contains examples of the collective injustices I experienced in the Middle East and America. It deals with some issues represented by the hostile behavior of some people against me in the Middle East, specifically in Egypt, like my ex-wife chasing me with the help of her brothers and her lawyers and some people hired to harass me and work against me. It also addresses examples of inexperienced individuals who must carry out their assigned roles as they should and some examples of corruption in business transactions. This part also includes examples of collective injustice against me in the United States of America, including illegal transactions, such as depriving me of more than a year and a half of teaching at the university, stopping my salary, persecuting me, and not recognizing my scientific status despite the innovations I make in sciences that did not exist before to serve all humanity. We, as a work team, have been working non-stop for more than 18 months, and the salaries I pay continue without stopping. During this period, many companies have harmed us, such as web companies (AWS, WordPress, and Namecheap), mobile phones (T-Mobile, AT&T, and Verizon), Credit bureaus, financial institutions (Wells Fargo), all social media outlets (LinkedIn, Facebook, YouTube), publishing companies (AMZ Publishing Pros.) and others. My team and I worked hard and provided everything needed for innovation and repair, so hope pushed us to publish many books for all authors within three months.

Today, I intend to return all these cases to the FBI and hire an excellent private attorney to defend me.

One of the best ways to achieve justice is to expose injustice.

California Faculty Association (CFA) Abandoning its Assigned Role.

At SJSU, many professors, lecturers, and leading authorities hatched conspiracies and fabricated unfounded accusations against me, infringing on my financial and professional rights. They could destroy my scientific reputation. They used to deal badly with me without justification. Moreover, the California Faculty Members Association joined hands with the university administration to demote and defame me. They did not provide me with any material or moral support. I still wonder why they used to act against me. The book contains instances of collective injustice to show that CFA works for the university administration, not for their members, in the following items:

- (1) No justice exists within the CFA
- (2) CFA plays evil roles
- (3) The CFA's bylaws are cheap propaganda.
- (4) Most CFAs weaken education in California.

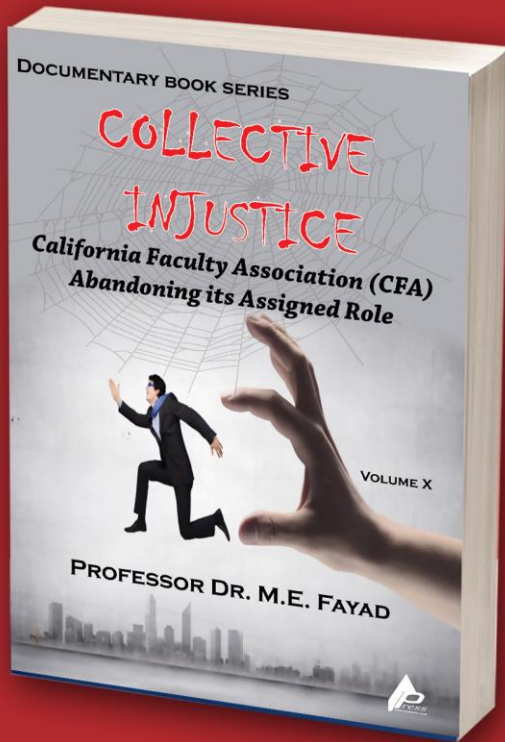

No one will dare
maintain that it
is better to do
injustice than to
bear it.

Lawyers

News & Press Releases

Based on the recommendation received in a June 19, 2023, letter from Mr. Rob Bonta, CA Attorney General, State of California, Department of Justice: "If you wish to pursue your complaint further, we suggest you contact a private attorney." He also said, "If you cannot afford to pay an attorney, you may consider contacting the local legal aid office."

I have a book or more with much evidence for each injustice, with many instances in each case.

Please feel free to connect me, and I am ready.
